This Office Action is in response to the response filed September 3, 2002.

Restriction to one of the following inventions is required under 35 U.S.C. §121:

- I. Claims 1-3, drawn to a semiconductor device, classified in Class 257, subclass 133.
- II. Claims 4-18, drawn to a method of making a semiconductor device, classified in Class 438, subclass 197.

The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. §806.05(f)). In the instant case, the process as claimed can be used to make another and materially different product, such as a bipolar transistor. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. See 37 C.F.R. §1.143.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. §1.48(b) and by the fee required under 37 C.F.R. §1.17(h).
